

SL	ISSUE DESCRIPTION	ISSUE TYPE	COMMENT
01	Product owner can see the "Add to Cart" button for their own products. Only pharmacy users will see 'add-to-cart' button. Other users (admin, depot) will not see the 'add-to-cart' button.	Customization Issue	Okay, we will make necessary changes
02	Difficulty differentiating between products added by vendors or admin.	New Feature	Adding a custom column for user role to product list in the admin panel might be helpful.
03	We want to display the number of vendors selling the product in the search bar, instead of the number of available products in stock.	Customization Issue	It is not actually issue because this feature was implemented to show total qty among shops. However, we will modify this feature to store counts.
04	Public users (visitors) will not see any products in the marketplace, only registered user will.	New Feature	As it was not mentioned in the original scope, we considered it as a new feature.
05	Show only verified users (pharmacy and depot) in the store list	Dokan Plugin Issue	Hopefully, it can be fixed with some configuration
06	Show seller badge in the store page	Dokan Plugin Issue	Hopefully, it can be fixed with some configuration
07	Configure wholesale module and show wholesale price along with regular price	Dokan Plugin Issue	Hopefully, it can be fixed with some configuration
08	It shows errors when importing GLN numbers with status value	Customization Issue	Okay, we will fix this issue.
09	Geolocation map is not working	Dokan Plugin Issue	Hopefully, it can be fixed with some configuration. However, there might need customizations because EczMarketplace shows products differently than default feature that I already mentioned. We are only giving hours to configure dokan geo module.
10	Show product locations in the single product page.	Dokan Plugin Issue	Dokan does not work with multiple locations for a single product. So we need to customize location features
11	Show store name instead of username in the verification table	Dokan Plugin Issue	Okay, we will fix it.
12	Show store name instead of username in the vendors table.	Dokan Plugin Issue	Okay, we will fix it.
13	No GLN data on the store page in the Dokan dashboard	Customization Issue	You can find GLN related info in the wp user profile page
14	Users can not know what is the type of store (pharmacy or depot)	New Feature	It was not mentioned in the original scope. However, we will add user type on the single store page
15	Store reviewing still not working	Dokan Plugin Issue	Okay, we will fix it again
16	Min-max qty issue	Dokan Plugin Issue	Okay, we will check and fix.
17	States should be removed	New Feature	Okay, we will implement the feature as described.
18	We require CRUD (Create, Read, Update, Delete) operations for the GLN list. Additionally, we need extra filtering options and a search functionality.	New Feature	Okay, we will implement the feature as described.
19	Remove the following fields from vendor payment info form: Account type, Swift code, Routing number, Bank address, Account number	New Feature	Okay, we will implement the feature as described.
20	We only require verification through the tax board (Vergi Levhası). We will accept only tax board documents for verification, so there is no need for verification through social media, address, ID, passport, or any other means.	New Feature	Okay, we will implement the feature as described.
